economic gain

MiC barriers and
opportunities to improve
work life balance and
gender equality in
European companies

Highlights and good
practices from 21
European pilot
companies

Gender equality benefits from men's participation - as men can benefit from gender equality. This conference will discuss ways to reduce gender inequalities in work-life balance policies and practices, improve gender equality, and enhance the well-being of women and men. The conference presents research results and good practice examples from eight countries: Austria, Germany, Iceland, Norway, North Macedonia, Poland, Slovenia & Spain. We expect international participants from companies, social partners, public administration, politics, and consultancy.
